

Transcript of Meeting with Client (Dean of Engineering)
Team Touchstone
Ronnie Rodriguez, Joe Higley, Morgan Holbart

Meeting began with introductions.

The Dean asked us about ourselves, what our majors were, where we were from, etc.

He then went into what he wants out of this project:

- * Product needs to be some sort of interactive “kiosk” that provides a visually appealing, user friendly interface that can be used to get important information from:
 - Campus Maps
 - Information on past Deans
 - Instructor/Faculty profiles and information
 - University clubs/organizations information
 - etc.
- * Must be cutting edge and have an immediate “wow-factor”. It really needs to speak to the fact that you are entering a college of engineering. He wants this to be something that draws people to the building, similar to the way the Think Tank does.
- * Needs to somehow honor Dean Janssen, the father of the person funding this project.
- * Needs to stay around \$6,000 as far as a budget goes, but the Dean believes that we could get as much as \$10,000 if our idea is ambitious enough.

The Dean then gave us a paper that had various kiosk-like technologies to give us some inspiration.

The Dean has said that he is leaving the way this is implemented entirely up to us. He said that the bare minimum would be a large touchscreen with the U of I website on display, but he would like it to be much, much more than that.

The Dean then took us out to the area where this product would be located, and let us know that we’d basically have the entire wall to the immediate right of the southern Janssen entrance.

After planning to have another meeting within the coming weeks to update him on progress and ideas, the Dean took his leave of us.
